

BIOTICS & SOIL AMENDMENTS · HOW TO USE

BFS W/ CHELATED IRON

The BFS soluble powder plus 2% chelated iron (Iron EDDHA) - soluble humate, seaweed extract, beneficial bacteria, plant vitamins, and iron for deeper color and correction of iron chlorosis. Runs in the hydroseed tank, foliar, or irrigation.

WHEN TO USE IT

- Deeper color
- Correct iron chlorosis
- Hydroseed tank, foliar, or irrigation

HOW TO MIX & APPLY

- 1** Confirm the job first - site, slope, soil condition, seed, and machine (jet or mechanical).
- 2** Fill the tank with water, then load your mulch and bring it to a uniform slurry.
- 3** Add TurfBlaster® BFS w/ Chelated Iron per the current product label and keep agitation up so it mixes in evenly.
- 4** Apply a complete, even pass and overlap your edges. Add a tackifier on slopes or ahead of weather before germination.
- 5** Water in and keep the surface moist through germination, per your seed and site.

RATES & COVERAGE

Applications **Hydroseed tank · foliar · irrigation**
(200-mesh screen for drip)

PRO TIP

Build the slurry in the right order and keep agitation up - even mixing is what gives you an even, uniform stand.

Always follow the current product label for application rates, mixing order, and handling. For job-specific guidance, ask the New Turf team or Sprout at hydroseed.ai. Order through **Hydroseed Supply** (hydroseedsupply.com).
