

TACKIFIERS

ECO-TAC - PAM TACKIFIER

Professional-grade PAM (polyacrylamide) tackifier - a sodium acrylate/acrylamide copolymer that dissolves quickly, lubricates the slurry through your gun, binds mulch to soil, and controls dust. A cost-effective bonding option for erosion-prone jobs.

IN PLAIN TERMS

Another glue for your slurry - a synthetic (PAM) tackifier. It dissolves fast, helps the mix pump smoothly through your gun, sticks mulch to soil, and knocks down dust. A cost-effective way to hold everything in place on erosion jobs.

COMPOSITION & GUARANTEED ANALYSIS

Type	PAM tackifier - sodium acrylate/acrylamide copolymer
------	--

ADDITIONAL PROPERTIES

Shelf life	Up to 5 years (cool, dry)
Note	Not a plant food. Slippery when wet - rinse hard surfaces.

APPLICATION & COVERAGE

Function	Tackifier · slurry lubricant · dust control
Dissolves	Quickly in the tank
Coverage	~2 acres per case

PACKAGING

Contact the distributor for pack sizes.

STORAGE & HANDLING

Store cool and dry, out of direct sunlight; keep containers closed when not in use. Follow the current product label for handling and precautions.

Technical data is drawn from the current TurfBlaster® product record and provided for professional reference. Always follow the current product label for application rates and handling. TurfBlaster® is the manufacturer; distributed by **Hydroseed Supply** (hydroseedsupply.com).
